Signatures:

Andrew Forche: Andrew Forche

Dom Spiotta: Dominic Spiotta

Nuo Chang: Nuo Cheng

Next Week's Planned User Scenario:

Creating stored procedures to handle the Log in function for users is the main objective of week 6. Andrew will create the front-end page for the user login as well as the sproc that confirms whether the entered data is a valid user combination or there is an error in the username or password. Nuo will create the sproc responsible for generating strong passwords and the user page for registering a user. Dom will begin work on a sproc to return admin access based on the user data acquired from login as well as assigning admin access when registering.
